

Mammal Research Institute Polish Academy of Sciences

invites you to participate in the

Summer School in Ecology and Biodiversity: Understanding Patterns and Processes

Białowieża, 28 May - 2 June 2007

The Summer School, organised in the frames of European Union's project BIOSEB is offered to graduate and PhD students starting their scientific careers.

The participants will have a chance to listen to lectures and take part in lab and field training conducted by the leading European and North American scientists. The training will cover a wide range of topics: ecological and conservation genetics, population and evolutionary ecology, biogeography and macroecology, physiological ecology, conservation of biodiversity, application of GIS in ecology and nature conservation, statistics and mathematical modelling in ecology, methods of ecological research on animals, and writing and publishing in science.

The event will take the form of one-week course for 50 participants combining lectures, seminars, and hands-on practical training, performed in Białowieża and Biebrza National Parks, Poland.

Participation in Summer Schools is free of charge - the European Commission covers the costs of participation fee of eligible participants. Furthermore, cost of travel and accommodation in Białowieża of all eligible participants will be covered by the project.

Please see our website for more details, application rules, and registration form:

www.zbs.bialowieza.pl/bioseb

Application deadline is 1st April 2007.

MRI PAS also offers the opportunity to receive a long-term training, conduct research for a degree thesis, and gain professional experience as a volunteer. Please check our website for details.
